URINCARE™ BLADDER MANAGEMENT SYSTEM

The **URINCARE™ Bladder Management System** is typically covered at **100% by the Veterans Administration** for male veterans who experience urinary incontinence or are at risk of falls due to neurological conditions such as **ALS, traumatic brain injury (TBI), dementia**, or conditions such as **spinal cord injury (SCI)**.

URINCARE™ is currently in use across the country within the Veterans Administration and is supported by **Urology Departments, Spinal Cord Injury Departments**, and **Home-Based Primary Care Physicians** nationwide.

If you are tired of dealing with the frustration of ineffective bladder management solutions, **talk to your VA healthcare provider today to find out if URINCARE™ is right for you.**

Omni Medical Systems

An Omni Measurement Systems Inc Company

RESTORING CONFIDENCE, HONORING SERVICE

Pilot-proven. Veteran-focused. The only sensor-driven pump that actively pulls urine away from the body.

ONE SYSTEM - TWO OPTIONS

URINCARE CUP™

The **URINCARE CUP™** is the original URINCARE™ external urinary management system designed to provide a comfortable, non-invasive solution for men experiencing urinary incontinence. Its unique design helps manage urine effectively while reducing many of the complications commonly associated with traditional urinary management products.

Benefits & Features

- Ⓢ Non-invasive urinary management solution
- Ⓢ No adhesives required, reducing the risk of skin irritation and discomfort
- Ⓢ Helps keep skin drier by directing urine away from the body
- Ⓢ Supports skin integrity and may help reduce moisture-related skin breakdown
- Ⓢ Ideal for patients who have experienced complications with other urinary management systems
- Ⓢ Designed for patients with adhesive sensitivities or intolerance
- Ⓢ Allows access for intermittent catheterization without invasive indwelling devices
- Ⓢ Helps reduce caregiver burden associated with frequent linen and clothing changes
- Ⓢ Promotes comfort, dignity, and quality of life
- Ⓢ Can be an effective option for patients who have experienced hospitalization due to urinary incontinence complications
- Ⓢ Simple, easy-to-use design
- Ⓢ Original URINCARE design with a proven history of urinary management

Experience a new level of comfort with **URINCARE™** and Omni's patented sensor driven technology.

This innovative, **non-invasive** system actively draws urine away from the body the moment it's detected—helping keep skin dry, healthy, and protected. Designed to support both advanced **incontinence care** and **skin integrity**, URINCARE™ empowers you with greater confidence, comfort, and freedom every day.

The URINCARE™ Control Unit (Pump)

works automatically so you don't have to think about it. When urine is detected by the CUP or FLO (condom), the pump turns on and gently moves it away from the skin. This helps you stay dry, comfortable, and worry-free throughout the day and/or night.

Advanced Comfort Collection Bag Options

• **Dual-Chamber Design**

Keeps urine away from the skin to help reduce irritation and improve comfort

• **Stay Dry & Odor-Free**

Proprietary leak-proof hydro-block air filter helps keep you dry while controlling unwanted odors

• **Flexible, Easy Options**

Available in Waist, Leg, and Bedside styles for convenience at home or on the go

URINCARE FLO™

The **URINCARE FLO™** System is a next-generation condom-style catheter designed for active patients who want reliable, all-day protection.

With a skin-friendly hydrocolloid adhesive (used in wound care), FLO™ provides a secure, comfortable fit for extended wear. Its patented technology allows air to circulate while sensors detect and immediately move urine away—helping keep you dry and protected from backflow.

Built for real life, FLO™ works whether you are walking, sitting, or sleeping, with kink-resistant tubing for dependable, worry-free performance.

Benefits & Features

- Built for Active Living
- Designed for patients who are on the move—supports sitting, standing, walking, reclining, and sleeping, including side sleepers
- 24-Hour Continuous Protection
- Provides reliable, around-the-clock urine management without frequent removal or interruption
- Extended Wear Comfort
- Features a hydrocolloid adhesive, commonly used in wound care, for a secure yet skin-friendly fit during extended wear
- Stay Dry with Patented FLO™ Technology
- Innovative design allows air to circulate through the FLO condom while actively evacuating urine as soon as it is detected
 - Helps keep skin dry
 - Reduces moisture buildup
 - Minimizes risk of backflow
- Smart Sensor Activation
- Integrated, patented sensors detect urine immediately and activate the system to move it away from the body
- Ideal for Intermittent Catheterization
- Designed to remain in place during catheter use, simplifying care and improving convenience
- Kink-Resistant Tubing
- Durable tubing helps prevent kinks, maintain consistent flow, and reduce risk of backflow or accidental disconnection
- Reliable Leak Protection
- Helps protect skin integrity while providing dependable, worry-free performance
- Greater Freedom & Confidence
- A flexible, secure system that adapts to active routines and diverse care needs
